

# RECONDITIONED STRETCHERS

www.ALCOSales.com

## Reconditioning Process:

1. All frames are visually inspected for bent or broken parts (any bent/broken parts are repaired/replaced so that operating features function properly)
2. Frames are completely disassembled
3. Frames are cleaned. All stickers and/or decals are removed, if necessary
4. Frames, arm rails and pans (if applicable) are sanded completely in a separate room
5. Frames and parts are then cleaned again to remove any dust or dirt
6. Frames, arm rails and pans are painted in a professional paint booth. They are baked dry and then left to dry for 24 hours
7. Frames are then reassembled to include the following NEW parts, if necessary:
  - OEM Casters
  - Plastic wheel covers and arm rail plastics
  - Head/footboards with your choice of inserts in each, when applicable
  - Labels and/or decals
  - Motor capacitors and couplers are replaced
8. Circuit boards are tested and repaired with 1 year replacement warranty
9. A final inspection of the products operating features are rechecked and electrical safety tested to ensure the product is performing to manufacturer's standards
10. Products are shipped wrapped in protective plastic; Blanket wrapped and can be positioned in custom stands for stability. Head/footboards are shipped unattached to the frames

- Overall Length: 83"
- Overall Width: 29-1/2"
- Height Range: Low 23" High 32-3/4"
- Litter Positioning: Fowler Backrest 0°-90°; Trendelenburg +12°; Reverse Trendelenburg -7°
- Patient Surface: 77" x 27"
- Side Rails: 14" x 76"

750 lb.  
capacity!

With Standard Side Rail

**AL-83880A**

With CuVerro® Antimicrobial Side Rail

**AL-83880C**

Now as an added protection in the ongoing battle with bacteria, ALCO offers side rails made from CuVerro® bactericidal copper alloy. Copper is an intrinsic bactericidal element and CuVerro® copper alloy is the ONLY class of solid touch metal registered by the EPA to continuously kill bacteria that cause infections and pose a risk to human health. Lab tests show more than 99.9% of bacteria associated with disease and infection, including MRSA, are killed within two hours when in contact with copper. Bacteria will continue to be killed 24 hours a day, week after week, between regular cleanings.

## Bariatric

1,000 lb.  
capacity!

- Three position drop down side rails
- 4" high density foam pad
- Four wheel central lock and brake
- Foot pedal control hydraulic Fowler back rest
- Top to floor: 29.5"; Overall width: 40"

**AL-58076**

## MRI

- Non-magnetic MRI Stretcher
- Four 5" total lock casters
- Fowler back headrest adjusts from 0 to 75°

600 lb.  
capacity!

- Stainless steel construction
- Non-marring, full surround rubber bumper protects on all sides
- 3" black stretcher pad (included) is covered with Medical-Grade Sure-Chek Fusion III material
