E-Lock

Programming Key AL-25967

The Programming Key is needed to initialize the lock so that the default combination can be changed and manager keys can be added. It is recommended to have one programming key per facility.

Manager Key AL-25968

The Manager Key can be used to open the lock. It can be used to change the combination (even when the existing combination is forgotten). It can also open the lock when the batteries have been depleted and need to be replaced.

Patient Security Cabinet - AL-25844

Patient Security Cabinet is made of heavy gauge steel with a beige powder coated finish that will match the durability of the cabinet construction. Each unit comes with one adjustable shelf and a programmable E-Lock for content security. The E-Lock provides keyless entry for patients or clinicians and requires two accessories, the Programming Key (AL-25967) and Manager Key (AL-25968), to initialize and manage the locking system. Both keys are sold separately. Warranted for 5 years with 1 year on the lock.
