Introducing the
SureTemp® Plus 690
Electronic Thermometer

Now taking temperatures is easier, safer, and more accurate.
And taking care of all your patients is more convenient.

The SureTemp® Plus 690—
with the speed and
accuracy you require, and
the versatility you need for
use with all your patients,
all the time.

- Easy to use, intuitive operation
- Removable probe well reduces the risk of cross-contamination
- Improved accuracy for even more reliable readings
- Greater versatility for use with all your patients, all the time

When we set out to improve the SureTemp, we knew we had our work cut out for us. After all, when you start with the thermometer that helped set the standard for speed and accuracy, the expectations run pretty high.

So how did we do? See for yourself by taking a look at the innovative SureTemp Plus 690—easier, safer and more accurate than the original, and still built to withstand constant use in demanding environments.

Easy: An easy-to-read LCD display with flashing icons that clearly communicate in any language, and an intuitive user interface and ergonomic shape make using the SureTemp Plus 690 a breeze.

Safe: Patient safety is improved thanks to an interchangeable probe well that reduces the risk of cross-contamination.

Fast and Accurate: In addition to improved accuracy, the SureTemp Plus 690 is one of the fastest thermometers on the market, providing approximately 4-6 second oral, 10-second pediatric axillary, 15-second adult axillary, and 10-second rectal measurements.

Versatile: To top it all off, you can now use the SureTemp Plus 690 with all your patients, from infants to adults—whether you need to take oral, axillary or rectal temperatures.
