

The SunOne System is Green System Compatible – fully compliant with ISO Standard 7376. GreenLine/D blades and handles are interchangeable with one another, as well as with any other Green System laryngoscope component. Because reprocessing requires chemical disinfection solutions that are harmful to the environment, these single patient use blades and handles eliminate reprocessing, which in turn reduces environmental impact. **Go green with the SunOne System!**

SINGLE PATIENT USE

GreenLine®/D™ Green Heel Blades

5 YEAR STERILITY

Soft matte surface finish prevents reflection and glare

Acrylic stem facilitates maximum LED illumination for superior tissue visualization

Constructed of non-painted 303/304 surgical stainless steel

Durable nylon extended heel prevents blade-to-handle contact; two ball bearing attachment design

Not Made with Natural Rubber Latex

STERILE EO
