

Oxylarm | Oxygen Flow Alarm

New!

"Safety in Mobility" The Solution That Saves Lives & Provides Peace of Mind.

Lack of oxygen or low oxygen levels in the body can cause many serious conditions, such as brain hypoxia, hypoxemia & even death. For this reason, Oxylarm was invented, a revolutionary solution for oxygen tanks. You can feel safe knowing that Oxylarm will notify you when your oxygen tank is running low or not working properly.

Oxylarm | Oxygen Tank Alarm System

- ◆ An alarm will sound when low levels are reached!
- ◆ Universal to all flows - continuous & intermittent
- ◆ Oxylarm was built to be very easy to use with minimal training
- ◆ Does not need to be disconnected from the portable O2 unit when filling from a stationary tank
- ◆ Oxylarm batteries are rechargeable, have a life expectancy of up to 8 months if used 8 hours per day
- ◆ Small & lightweight solid state design
- ◆ FDA approved
