

## Mobile Tablet Carts

Our tablet carts are designed for security and convenience. They are perfect for telemedicine and documentation. The inner column can be adjusted to position the tablet at the perfect height. The inner column has our air glide design so it will slowly drift lower when the locking knob is released. The AL-87954 comes with 4 Ram Style IV hooks at the top of the unit. The tablet holder is attached to the column with our clamping system that allows the tablet to be secured anywhere on the column. The unique tension hinged design of the tablet holder allows the operator to easily change the angle of view and the hinges ensure that the angle does not change.

- Stainless steel column design for durability and easy cleaning
- Air glide system controls descent of pole
- Holds up to four 3,000 cc containers
- Tablet holder accommodates tablets measuring from 6" to 12.25" wide, 6" to 12.25" high and .75" deep or less.
- (5) 2.5" Dual wheel plastic casters - two locking and three non-locking
- 22" Plastic Base
- 5-Year Warranty – 1-year on casters
