Respiratory Hygiene Station - Locking Installation Instructions/Material Care & Construction

Installation

Always mount dispensers securely prior to loading with product.

maintenance.
• It can also be mounted to a Floor Stand (sold separately).

Mount securely to a wall with screws approved and supplied by building

Parts included:

Dispenser

Tools Required:

· No tools required to assemble dispenser

Care and Construction ABS Plastic

Material Characteristics

Designed for Long-Term Heavy-Duty Applications

The combination of copolymers (Acrylonitrile, Butadiene, and Styrene) gives ABS an excellent combination of strength, rigidity, and toughness.

ABS is chemical and stress-crack resistant. It is tough, dimensionally stable, and will hold up to long-term use. It possesses high strength and performance characteristics at a reasonable cost.

Care and Cleaning

Use mild soap and water to clean. Petroleum-based oils, solvents, and paints should not be used.

Standard hospital cleaning supplies can be used.

Care and Construction Fauxwood ABS Plastic

Material Characteristics

Designed for Long-Term Heavy-Duty Applications

The combination of copolymers (Acrylonitrile, Butadiene, and Styrene) gives ABS an excellent combination of strength, rigidity, and toughness. The fauxwood finish is ARVINYL laminate created from a semi-rigid film.

ABS is chemical and stress-crack resistant. It is tough, dimensionally stable, and will hold up to long-term use. To ensure product longevity, fauxwood products should not be mounted in very hot or cold areas.

Our fauxwood material is engineered to have a natural grain appearance both in Cherry and Maple finishes. The two color choices provide a visually appealing, upscale option to any area.

Care and Cleaning

Signature Series products can be cleaned with standard hospital cleaning products. Petroleum-based oils, solvents, and paints should not be used. Standard hospital cleaning supplies are approved for use on our fauxwood products.

Care and Construction Powder-Coated Steel

Material Characteristics

Designed for Long-Term Use

Our steel dispensers and stands are coated with polyester powders which makes them highly resistant to corrosion.

Powder-coated steel is ideal for dispensers used in a healthcare or an industrial setting because it is impact resistant and is not effected by extremes in temperature.

Dispensers and stands made of powder-coated steel are both attractive and functional, providing years of service.

Care and Cleaning

The powder coated finish resists common chemicals and cleaning agents and can be easily wiped clean with soap and water.
