

ANTI-THEFT

WHEELCHAIR ACCESSORIES

Did you know that every year most facilities report a 10 percent loss in their wheelchair fleet, a number that can sometimes reach up to 25 percent depending on location. All medical facilities have to deal with wheelchair theft at some point. It is extremely costly for medical facilities and replacing them can add up, making a significant impact on a hospital's budget. Fortunately, ALCO Sales can provide your facility with an array of accessories that will deter most theft.

IV/O₂ RIGID IV POLES

- When installed correctly, it is difficult to place wheelchair in most vehicles
- ALCO has placed the IV ram hooks to face outward, away from patients' head, creating additional safety to patients

Here's How →

PUSH BARS

- Ergonomic design
- Prevents wheelchair from folding
- Many allow for one hand operation

ANTI-THEFT ACCESSORIES

- These ULTIMATE Anti-Theft Devices make it literally impossible to steal a wheelchair
- Collar Locks prevent legrests from being removed, making it harder to fit the chair in a vehicle
- Anti-Fold Bar prevents chair from folding, making the chair bulky and harder to steal
