Evaluation Tool

Accutrax® provides accurate distance tracking in all settings, such as at home going room to room, or in a rehabilitation setting performing activities of daily living. This meter facilitates the formation of an accurate baseline of mobility, which is essential for a full assessment of the patient's ability as well as for an effective treatment plan.

Documentation

Better measurement precision when documenting, reduces the risk of discrepancies which can be the cause of many claim denials. **Accutrax®** is accurate and objective thus eliminating the need to guess ambulation distance.

[More Info](#)

Motivational

The highly visible digital display on **Accutrax®** allows the client to monitor their ambulation distance during their therapy sessions, providing the intrinsic motivation required to reach their daily and long term goals.
